Could you please provide the list of ingredients found in Prostazen?

Prostazen is composed of a carefully curated selection of natural ingredients, each chosen for their specific benefits that support prostate health. Let us examine the key components and their contributions in detail:

### Saw Palmetto

Saw Palmetto is recognised as a prominent natural remedy for maintaining prostate health. This small berry, indigenous to the southeastern United States, is noted for its potential to promote prostate health. One of its significant advantages is its strong antimicrobial properties, which may assist in lowering the risk of urinary tract infections commonly associated with prostate concerns. Furthermore, Saw Palmetto has demonstrated efficacy in alleviating symptoms associated with benign prostatic hyperplasia (BPH), a prevalent condition characterised by frequent urination. By inhibiting the conversion of testosterone to dihydrotestosterone (DHT), Saw Palmetto supports hormonal equilibrium, mitigating prostate enlargement and enhancing overall urinary health.

Pygeum Africanum is sourced from the bark of the African plum tree and has a long history of use in enhancing bladder function. This extract is recognised for its antibacterial properties, which

may assist in preventing urinary tract infections and promoting overall urinary tract health.
