

Totally Bangin Self Tan

Natural Self Tanner for 40+

Totally Bangin is a highly regarded secret among celebrities, fitness models, and beauty professionals. Carly Scott, the creator of the formula, asserts that it can provide a luminous glow for as long as 11 days, irrespective of your skin type. This product is a self-tanner formulated with entirely skin-friendly botanical ingredients. This formulation incorporates botanicals sourced from nature, delivering equivalent benefits while addressing the unique needs of the skin.

Many tanning products overlook the fact that a woman's skin may exhibit cellulite, stretch marks, and various irregularities that can retain drying agents like alcohol and fragrance. The company utilises ultra-absorbent

extracts from sunflower and cocoa seeds to create a strong, comprehensive moisture barrier. As a result, you will maintain a clear and even complexion. This product effectively promotes the natural, dark brown tan you have consistently sought after.

The company produced Totally Bangin as an exceptionally lightweight mousse, designed for ease of application compared to any other self-tanner you may have experienced. The surface is gentle on the knees, elbows, feet, and hands. Furthermore, this non-adhesive formulation achieves a dry state in approximately three minutes. The company has removed the chemicals that contribute to the undesirable orange and streaky appearance often associated with other self-tanners. There are no stimulants or substances that are not easily absorbed. Furthermore, Totally Bangin is manufactured in facilities that adhere to GMP standards.

Completely Impressive Composition

Many prominent beauty product manufacturers incorporate specific harmful substances in their formulations to reduce costs. The application of alcohol and perfume may result in increased openness of your skin pores compared to normal conditions. It is possible

that you have observed various streaks, marks, and spots, or perhaps noticed a decline in your radiance within just a few days. Totally Bangin exclusively employs glycols, which possess antibacterial and preservation characteristics comparable to alcohol, while also effectively attracting and retaining moisture. The formulation comprises identical elements found in lotions and moisturisers designed for paediatric medical applications. The fundamental components of Totally Bangin and their benefits are:

Sunflower Seed Oil

Carly aims to ensure that you feel at ease when applying Totally Bangin' to your sensitive facial skin. Sunflower seed oil was included in the formulation due to its ability to serve as a protective barrier against bacteria while remaining non-comedogenic. It exhibits remarkable absorbency. Consequently, it infiltrates the skin's layers thoroughly, resulting in a sensation of silky smoothness.

Beetroot Extract

Beetroot plays a role in reducing the accumulation of melanin, a key factor in hyperpigmentation. Furthermore, it promotes the rejuvenation of skin cells, thereby reducing the likelihood of dry skin, fine lines, and wrinkles forming. It is thought that the high vitamin C

content in beets may contribute positively to skin health and potentially offer protection against signs of ageing, including wrinkles.

Cranberry

This potent antioxidant can reduce the growth of fine lines and wrinkles. It assists in preventing the breakdown of collagen over time. These powerful berries can even aid in treating body acne since their acids continually unclog pores, so they do not become clogged. Cranberries possess a high concentration of polyphenols, along with Vitamins C and E, which play a significant role in neutralising free radicals, thereby minimising the visibility of wrinkles.

Vitamin E

This effective vitamin has the ability to improve skin uniformity by significantly enhancing its overall tone and texture. This process enhances the renewal of skin cells and improves blood circulation during sleep, leading to firmer skin. Vitamin C has been shown to play a role in diminishing inflammation and addressing the bacterial accumulation that contributes to acne. No wonder dermatologists have suggested it for nearly six decades.

Cocoa Seed Butter

By effectively sealing the skin's moisture barrier, you can ensure that your tan lasts for an extended period. These buttery fatty acids may aid in moisturising and rejuvenating dry, flaky regions, including the knees and elbows. The company has incorporated this to enhance your radiance and extend its duration. Raw cocoa powder has the potential to enhance the skin's elasticity, which may reduce the visibility of fine lines, wrinkles, and scars.

Rosa Canina Seed Oil

This natural anti-inflammatory oil is very effective at correcting color. It is rich in critical fatty acids, vitamins A and C, necessary for skin renewal and cell healing. It can diminish the appearance of skin discoloration, stretch

marks, scars, and fine wrinkles. In addition, it locks in the hydration and benefits of the natural oils of our other components.

Cucumis sativus

The application of cucumber can assist in achieving a smooth and uniform texture on the posterior aspect of the legs by effectively tightening areas of dimpling and irregularities. It may assist in minimising the size of pores, the visibility of fine wrinkles, and the level of inflammation. Additionally, it significantly improves the skin benefits of other compounds by drawing in additional moisture.

Comprehensive Usage Guide

A significant number of women have conveyed their hesitation towards self-tanning. That is not an acceptable situation. Carly developed 'Totally Bangin'' with the intention of creating the most user-friendly self-tanner available. It can be administered in a timeframe as brief as 10 minutes. The formulation is non-sticky, allowing it to glide smoothly over the knees and elbows without any clumping issues. The simplicity of 'Totally Bangin' ensures that you can trust in achieving a flawless, natural-looking tan consistently. Upon application, the tan endures for a duration of 11 days without necessitating

any maintenance. As a natural tan would, your color will fade away without becoming blotchy or patchy.

Apply 2-4 pumps of lightweight mousse to your tanning mitt for an effective and straightforward application process.

In under 10 minutes, the lightweight mousse can be easily applied from head to toe. It is important to note the smoothness with which it glides over the knees, ankles, and elbows.

Given its rapid drying time of three minutes, it enables you to proceed with your daily activities without interruption.

Allow the product to remain on the skin for a duration of one to three hours, or overnight, to achieve a more pronounced tan.

A quick rinse in the shower, without the use of soap, can effectively maintain cleanliness for as long as eleven days. The colour will progressively diminish, resembling the way a natural tan would fade over time.

Comprehensive FAQs

Q: What is the duration of this effect?

A. The duration of your tan is limited to the uppermost layer of your skin; hence, 'Totally Bangin'' is formulated to retain moisture, allowing your tan to persist for up to 11 days. Your daily schedule will significantly impact the

number of additional days you can maximise from each application, as every individual is distinct. Carly will provide you with the most effective recommendations for prolonging the longevity of your tan.

Q: Is there a possibility that Totally Bangin' could leave stains on my clothing, rugs, or sheets?

A. Your garments and beddings will remain free from stains. It is essential to allow sufficient time for the tan to fully develop before dressing or retiring for the night, much like the process of applying foundation to your complexion. It is advisable to wait around 30 minutes before making any changes to minimise the risk of staining your clothing. Carly advises that it is beneficial to wear loose-fitting dark clothing following the application.

Q: How would you describe the odour?

A. The odour associated with artificial tanning is a result of DHA interacting with the epidermis. Many manufacturers try to conceal the unpleasant odour with harsh, artificial fragrances, which can lead to skin dehydration and exacerbate the odour issue. The company utilised entirely natural DHA and exclusively natural plant ingredients to formulate a subtle, earthy fragrance that is barely perceptible.

Q: Is it resistant to perspiration?

Affirmative. It is important to ensure that sweat does not compromise your tan. It is recommended to refrain from engaging in vigorous exercise until your tan has completely set. Allow a period of 3 to 4 hours before rinsing. Once you are pleased with your tan and have appreciated the outcomes, you may proceed to swim in the pool or engage in gym activities. However, it is important to consider that exposure to seawater and chlorinated pools could lead to a more rapid fading of your tan.

Where can one purchase Totally Bangin?

Totally Bangin is exclusively available for purchase on the official website. Please proceed by clicking the purchase button located on the homepage, which will direct you to a secure SSL-encrypted order form for your convenience. Please choose the plan that best aligns with your requirements, and proceed with the payment process.

The objective of the company is to ensure that every order is dispatched on the same day it is received. If this is not physically possible, your package will be dispatched at the earliest opportunity. Upon dispatch of your mousse order, you will receive an email notification

along with a tracking link, enabling you to monitor and ascertain its status effectively.

On the official website, individuals can explore a range of cost-effective options, including the following:

The cost for one bottle of Totally Bangin is \$47.77.

Three bottles of Totally Bangin, along with a complimentary mitt and face brush, priced at \$40.77 each.

Six bottles of Totally Bangin: \$35.77 per bottle

Many tanning salons assure that you will avoid an orange and streaky appearance. However, those tanning beds were not created with your skin's health as a priority. Consequently, the practitioner will ensure that you achieve the desired tan you envision. They will ensure your satisfaction or provide a full refund.

If you have any doubts about the ease of application, non-sticky nature, and rapid drying of your new tan, please reach out to the support team, and they will process a full refund for you. You are allotted a period of 180 days to fulfil this task. Returning the bottles means you have no financial obligation to the corporation, so there's no need for concern. If you have any enquiries concerning the Totally Bangin, please reach out to support for assistance.

Comprehensive and Well-Considered Conclusion

Totally Bangin is a smooth, natural true-bronze formulation that can be applied in just 10 minutes and provides results lasting up to 11 days. This formulation consists entirely of natural botanicals, meticulously chosen to meet the evolving needs of ageing skin. Furthermore, it ensures that the skin does not exhibit any orange, blotchy, or streaky characteristics, while promoting a more supple, taut, and smooth appearance with just one application. The natural and nutritious elements work in harmony with your skin tone, resulting in a beautiful and natural appearance. Each application will promote the strengthening, tightening, and firming of your skin.

The company selected formulations that effectively purify the pores prior to the onset of acne. Your tan will persist only for the duration of your epidermis's renewal cycle. The effective components support the integrity of the outer layer for a duration of up to eleven days. Furthermore, your outer layer is now capable of shedding evenly, resulting in a fade that resembles a natural tan. You can expect a notable enhancement in your confidence levels. You will be looking for chances to

display your smooth, radiant complexion. You can attain a natural-looking, long-lasting tan that will give your friends the impression that you've been basking in the sun in Bali.
